Product Description

Double glass broken bridge Casement windows can be customized for balcony

Casement Window Installation Process

Preparation

1. Ensure you have the necessary tools (screwdriver, level, measuring tape, etc.) and materials (new window, shims, insulation, flashing).
2. Carefully take out the existing window, including the frame, if necessary.

Measure the Opening

1. Measure the width and height of the window opening to ensure the new casement window fits properly.
2. Make any necessary adjustments to the opening for a snug fit.

Dry Fit the Window

1. Temporarily place the new window in the opening to check for fit.
2. Ensure the window is level and centered in the opening.

Secure the Window

1. Insert shims around the window frame to hold it in place.

Insulate and Seal

Fill any gaps around the window frame with insulation material to improve energy efficiency.

Install Flashing

Apply flashing tape around the exterior edges of the window to direct water away and prevent leaks.

Finish Interior

Install interior trim or casing to cover gaps and enhance the appearance.

Final Inspection

Open and close the window to ensure smooth operation.

What are the advantages of casement windows?

1. The design allows for secure locking mechanisms, which can improve safety.
2. Many modern casement windows are designed with durable materials that require minimal upkeep.
3. Their clean lines and modern look can enhance the overall appearance of a home.
4. Typically operated with a crank, making them easy to open and close, even in hard-to-reach places.
5. Aluminum casement windows are strong, lightweight, and resistant to corrosion, making them suitable for coastal or high-humidity areas.

Features:

1. Design: They are often tall and narrow, providing a clear view and maximizing ventilation.
2. Versatile Opening: They can be opened fully to allow maximum ventilation, making them ideal for fresh air circulation.
3. Operation: Casement windows open outward like a door, allowing for better airflow compared to sliding windows.
4. Variety of Styles: Available in various styles, they can match different architectural aesthetics.
5. Security Features: Many casement windows come with multi-point locking systems, enhancing security.

Technical Data:

1. Double Glaze Double Clear Tempered Glass
2. U Factor = 0.28-0.38 Size depending.
3. Modular swivel-tilt mounting system with concealed hinges
4. Simple and intuitive operation
5. The 3.4mm wall thickness guarantees greater stability and durability of the window and increased protection against noise and temperature changes.

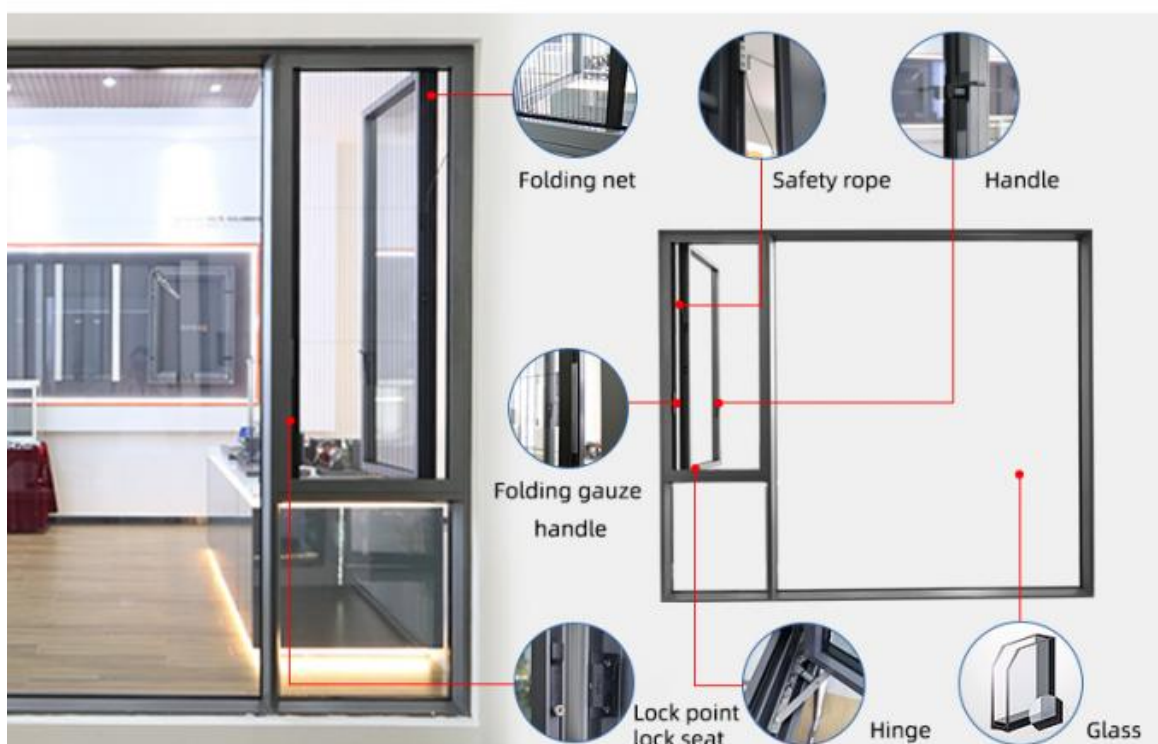

Product Parameters:

SERIES	125 Extremely narrow Window
BRAND	Eloyd
PROFILE	6063# T5 aluminum alloy profiles
THICKNESS	3.4mm aluminium thickness
GLASS	5mm+27A+5mm Double Tempered Glass
HARDWARE	Gingle Handle
SURFACE TREATMENT	Powder Coating, Anodized
