Aluminum Alloy Frame Windows Thermal Break Aluminum Glass Tilt And Turn Windows

What is a Tilt And Turn Window?

The 110 Series Tilt and Turn Windows are designed to provide a blend of functionality, durability, and aesthetic appeal. tilting inwards from the top for ventilation and swinging open like a door from the side. Aluminum tilt and turn windows are ideal for both residential and commercial buildings, making them a popular choice for modern architecture. They work well in high-rise apartments, office buildings, and homes where both function and style are desired. The 100 Series Tilt and Turn Windows combine modern design and functionality, making them an excellent choice for contemporary buildings. Their versatile features and energy-efficient options cater to a wide range of architectural needs. Always consult specific manufacturer documentation for precise specifications and performance ratings.

What are the advantages of Tilt And Turn Window?

1. Made from high-quality aluminum, these windows resist corrosion and are built to withstand various weather conditions
2. The sleek lines and various color options enhance the visual appeal of any building
3. Available in different sizes and finishes
4. The design contributes to good sound insulation
5. The inward opening does not require additional space outside, making them ideal for areas with limited clearance.

Technical Data:

1. Material: 6063# T5 aluminum
2. U Factor = 0.25-0.38 Size depending.
3. Tilt operation allows the window to open inward from the top.
4. Usually rated for 15-30 PSF, indicating resistance to water infiltration.
5. Resist fading and chipping.

Features:

1. Provides good sound insulation, creating a quieter indoor environment.
2. Designed to withstand harsh weather conditions, ensuring longevity.
3. allowing fresh air while maintaining security.
4. allowing for larger window sizes without compromising structural integrity..
5. improving insulation and energy performance.

Technical Data:

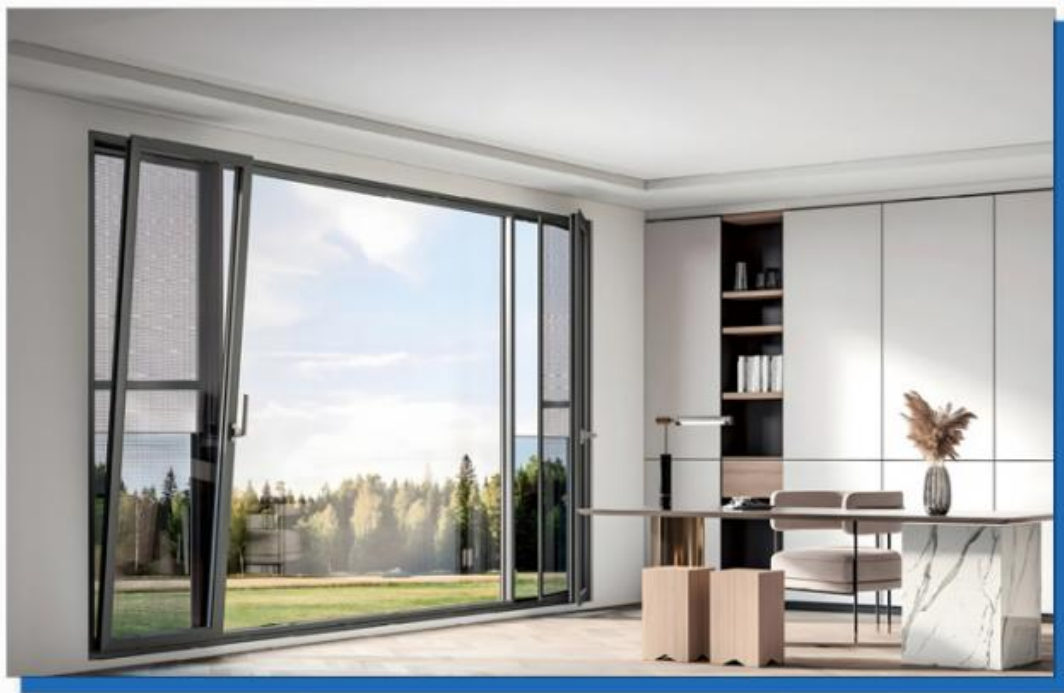

1. Material: 6063# T5 aluminum
2. U Factor = 0.25-0.38 Size depending.
3. Tilt operation allows the window to open inward from the top.
4. Usually rated for 15-30 PSF, indicating resistance to water infiltration.
5. Resist fading and chipping.
