110 Series Extra Large European Glass Tilt And Turn Windows Functionality

What is a Tilt And Turn Window?

The 110 Series Tilt and Turn Windows are designed to provide a blend of functionality, durability, and aesthetic appeal. tilting inwards from the top for ventilation and swinging open like a door from the side. Modern aluminum windows are suitable for many types of buildings. Whether it's a historic building, detached private residence, office building or a multi-family house, stylish window profiles can achieve consistency of design between the building's exterior and interior walls. Thankful to the highest level of German technology, engineers developed a multi-chamber window profile. The new design has a major impact on technical properties such as thermal and acoustical insulation.

Technical Data:

1. Material: 6063# T5 aluminum
2. Versatile and simple adjustment
3. Thermal Transmission ≈ 0.19
4. Modular turn-tilt fitting system with visible hinge side
5. Simple and intuitive operation

What are the advantages of Tilt And Turn Window?

1. Made from high-quality aluminum, these windows resist corrosion and are built to withstand various weather conditions
2. The sleek lines and various color options enhance the visual appeal of any building
3. Available in different sizes and finishes
4. The design contributes to good sound insulation
5. The inward opening does not require additional space outside, making them ideal for areas with limited clearance.

Features:

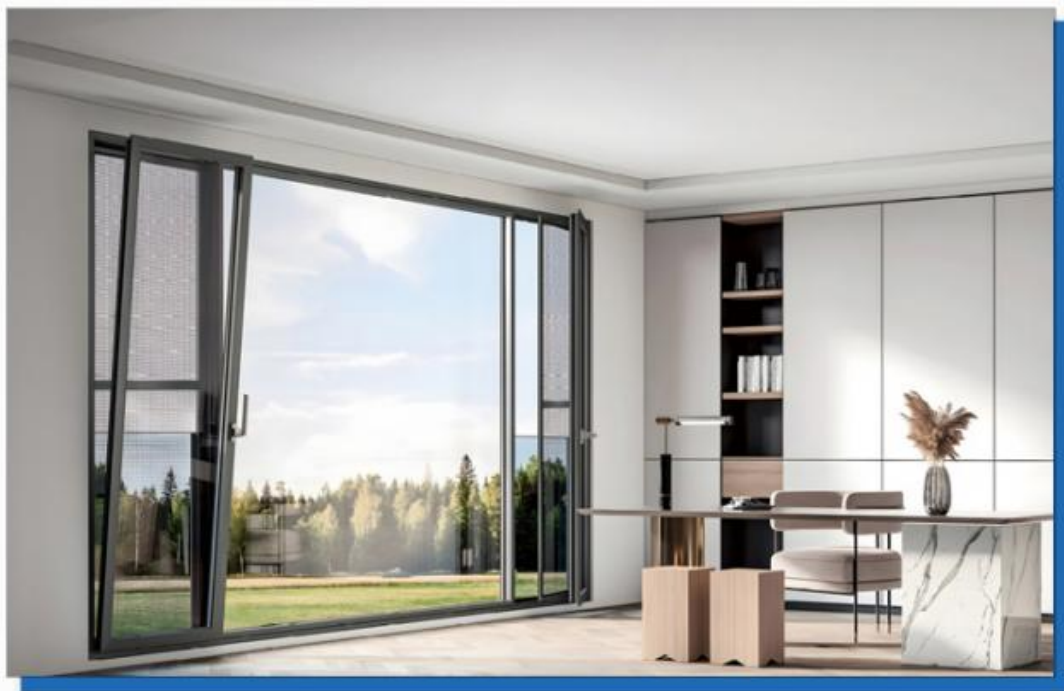

1. Provides good sound insulation, creating a quieter indoor environment.
2. Designed to withstand harsh weather conditions, ensuring longevity.
3. allowing fresh air while maintaining security.
4. allowing for larger window sizes without compromising structural integrity..
5. improving insulation and energy performance.
