Delicate Bevels And Slants For Modern And Elegant Aluminum Tilt And Turn Glass Windows

What is a Tilt And Turn Window?

Eloyd is proud to offer Authentic European Tilt & Turn Windows, featuring dual-action, European tilt-and-turn hardware. This high-performance hardware enables the window to tilt inward at the top for maximum ventilation. High thermal insulation of aluminum material combined with multi chamber profile structure ensures the highest comfort of living. In fact aluminum windows have the highest energy rating in the US outperforming all brands of wooden windows. Double or triple pane glass have the added benefit of being extremely effective in deadening sound. It makes aluminum windows the best choice for buildings or homes located close to railroads or noisy roads.

Technical Data:

1. Low-e double glazing
2. U Factor = 0.23-0.24 Size depending.
3. Six-chamber construction provides ideal thermal protection
4. Individual design matching due to powder-coated hinge parts or caps in different colors
5. delicate bevels and slants give the profiles a modern and elegant look.

What are the advantages of Tilt And Turn Window?

1. Made from high-quality aluminum, these windows resist corrosion and are built to withstand various weather conditions
2. The sleek lines and various color options enhance the visual appeal of any building
3. Available in different sizes and finishes
4. The design contributes to good sound insulation
5. The inward opening does not require additional space outside, making them ideal for areas with limited clearance.

Features:

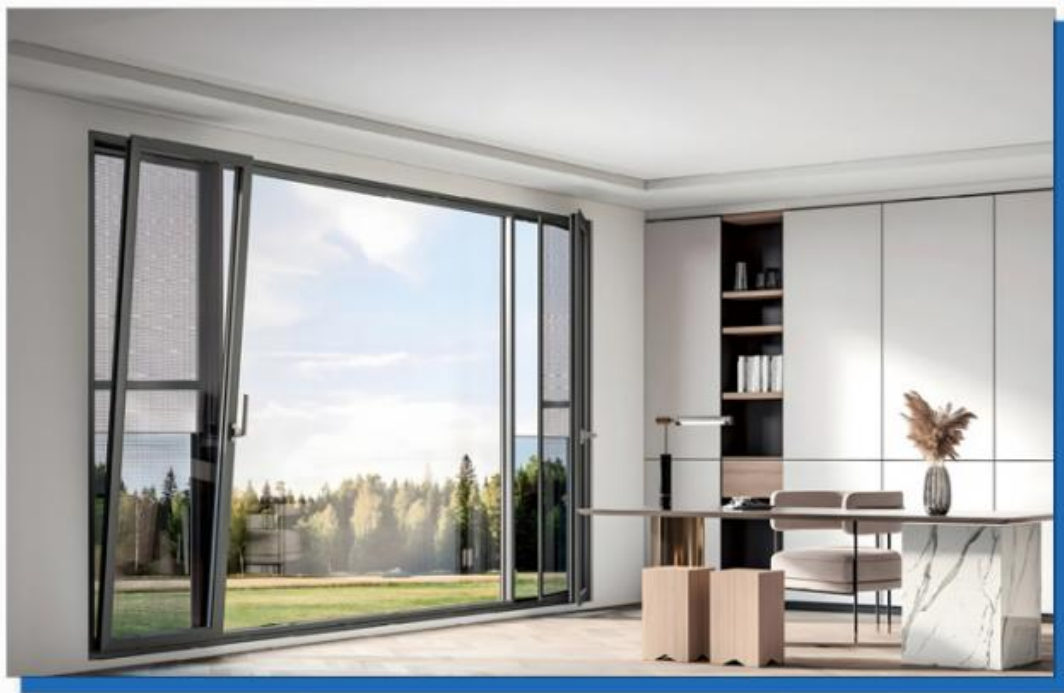

1. Provides good sound insulation, creating a quieter indoor environment.
2. Designed to withstand harsh weather conditions, ensuring longevity.
3. allowing fresh air while maintaining security.
4. allowing for larger window sizes without compromising structural integrity..
5. improving insulation and energy performance.
