Black Aluminum Windows Glass Tilt And Turn Windows Dual Function

Technical Data:

1. Low-e double glazing
2. U Factor = 0.23-0.24 Size depending.
3. Six-chamber construction provides ideal thermal protection
4. Individual design matching due to powder-coated hinge parts or caps in different colors
5. delicate bevels and slants give the profiles a modern and elegant look.

What is a Tilt And Turn Window?

High-performance aluminum gives European-style tilt and turn windows an elegant presence in a sleek, stylish European design that is suitable for both commercial and high-end residential applications. It is the ideal material for building a tight seal that minimizes the infiltration of air, water and noise. Energy-efficient European-style tilt and turn windows will pay for themselves by helping you reduce heating and cooling costs. The new design has a major impact on technical properties such as thermal and acoustical insulation. Tilt and turn windows, as its name implies, have dual function handle allowing window to "tilt" inward (position C) for ventilation, and "turn" (position D) for easy cleaning. The turn design works excellent as an escape point in case of emergency.

What are the advantages of Tilt And Turn Window?

1. Made from high-quality aluminum, these windows resist corrosion and are built to withstand various weather conditions
2. The sleek lines and various color options enhance the visual appeal of any building
3. Available in different sizes and finishes
4. The design contributes to good sound insulation
5. The inward opening does not require additional space outside, making them ideal for areas with limited clearance.
