What is a sliding Window?

Sliding window is a popular choice due to its contemporary style, convenient operation and time saving, creating a perfectly connection between indoor and outdoor spaces. A sliding window is a type of window that operates by sliding horizontally on sliding tracks. It typically consists of two or more sashes. This design allows for easy opening and closing of the window by simply sliding the sashes left or right. Sliding windows are favored for space saving design, providing large view and ventilation. It is a regular selection for residential and commercial settings.

Features:

1. One or more sashes slide past each other to open and close.
2. Single Slider: One sash is fixed, while the other sash slides.
3. Double Slider: Both sashes can slide, allowing for more flexibility in ventilation.
4. Many sliding windows come with double or triple glazing options and low-emissivity (Low-E) glass for improved thermal performance.
5. Typically equipped with secure locking systems to enhance safety.
