

NFRC Certified Thermal Break Sliding Glass Doors System Aluminum Hurricane Proof Impact Slide Door Energy Saving Low E for Patio

Our Product Introduction

for more products please visit us on aluminiumwindowsdoor.com

Basic Information

- Place of Origin: China
- Brand Name: Loyd
- Certification: CE
- Model Number: 56 serie sliding door
- Minimum Order Quantity: 2
- Price: USD78/
- Packaging Details: EPE Foam wrapped
- Delivery Time: 25-30days
- Payment Terms: L/C,T/T,Western Union,PayPal
- Supply Ability: 10000

Product Specification

- Opening Direction: Left/Right
- Installation Method: Surface Mount
- Material: 2.2mm/3.0mm Thick Aluminium
- Glass: 5+20A+5mm Double Clear Tempered Glass
- Design: According To Confirmed Drawing
- Drawings: 3D Design Drawings
- PackageMethod: EPE Foam Wrapped
- Hardware: BOGO Hardware
- Stainless Steel: 10 Years

Product Description

NFRC Certified Thermal Break Sliding Glass Doors System Aluminum Hurricane Proof Impact Slide Door Energy Saving Low E for Patio

Strong practicality: Sealing, sound insulation and durability all in one

Excellent sealing performance

Multi-seal design: wool strips + silicone sealing strips + magnetic strips, effectively preventing dust and rainwater from seeping in, suitable for areas with strong wind and sand or high humidity (such as coastal cities);

Air tightness: The combination of broken bridge aluminum profiles and EPDM rubber strips reduces the air convection between indoor and outdoor, enhancing the efficiency of air conditioners and heaters.

The sound insulation and noise reduction effect is remarkable

Double-layer insulating glass (such as 5mm+20A+5mm) can reduce noise by 30 to 40 decibels. After being used in street-facing residences or offices, the indoor noise can be controlled below 35 decibels (close to the environment of a library).

Heavy-duty pulley system: Reduces vibration during opening and closing, further lowering noise.

Flexible zoning and dynamic adjustment of space

Sliding doors can be opened or closed at any time, enabling quick switching of space functions.

Open mode: Connect the living room and the dining room to expand the social area;

Closed mode: Isolate cooking fumes, noise or protect privacy (such as bedrooms, studies).

Hidden tracks provide a neater visual experience

The track is embedded in the ceiling or floor to prevent exposed hardware from spoiling the appearance. It is especially suitable for modern Spaces that pursue a "no main material" design.

Sliding doors, as the "space magician", have become an indispensable functional element in modern architecture through efficient area utilization, minimalist aesthetic design, excellent sealing and sound insulation performance, as well as wide adaptability. Whether it's a small-sized apartment that pursues practicality or a large house that emphasizes quality, sliding doors can provide customized solutions, achieving a perfect balance between aesthetics and functionality.

Why choose Eloyd Windows and Doors ?

1. Raw aluminum profiles

Corrosion resistance, good oxidation resistance, higher strength

2. Insulated tempered glass

3C quality certified automotive grade glass, strong pressure resistance, not easy to explode

3. German RUNAS hardware

Anti-stretching and anti-aging, good sealing and overlapping effect, long-lasting and stable performance

4. PICC China PICC Underwriting

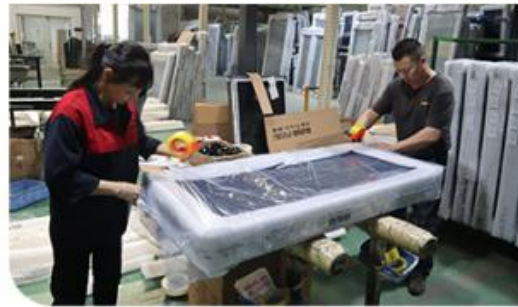

All products of Eloyd doors and windows have passed the inspection by the national quality inspection and supervision department and are insured by China PICC. Buy with confidence and use with confidence.

Product Parameters:

SERIES	76 series sliding door
BRAND	Eloyd
PROFILE	6063# T5 aluminum alloy profiles
THICKNESS	3.0mm Thick Aluminium
GLASS	5+22A+5mm Double Clear Tempered Glass
HARDWARE	BOGO Lock & Handle
SURFACE TREATMENT	Powder Coating, Anodized
